The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/517,811	Applicant(s) DELMAS, PIERRE-ANDRE	
	Examiner MICHAEL T. PIERY	Art Unit 1791	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of claims 1-6 in the reply filed on October 9, 2008 is acknowledged.

Claims 7-12 have been cancelled.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
 2. Ascertaining the differences between the prior art and the claims at issue.
 3. Resolving the level of ordinary skill in the pertinent art.
 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
2. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Allman et al (US 6,355,320).

Regarding claim 1, Allman teaches placing a polymeric material comprising VAE (Claim 4) in an extruder comprising a casing, screw, and nozzle (Column 7, lines 55-67), injecting gas under pressure into the polymer (Column 8, lines 8-17), shaping the material through the nozzle

Art Unit: 1791

of the extruder (Column 9, lines 38-50) and cutting the extrusion to form stoppers (Column 10, lines 20-25). It is not explicitly stated that the mixture is homogenized, however it would have been obvious to one of ordinary skill in the art at the time of the invention to homogenize the mixture in order to produce a uniform product, a desired property according to Allman (Column 5, line 20).

Regarding claim 2, the coloring material is introduced at the outset (Column 11, lines 15-20) and the gas is injected upstream (Column 8, lines 1-5).

Regarding claim 3, Allman teaches the density is between 0.2 and 0.6 g/cm³ (Column 5, lines 30-35).

Regarding claim 4, Allman teaches incorporating HDPE or LDPE with VAE (Claims 3 and 4).

Regarding claim 5, Allman teaches the claimed composition ranges for the stopper (Claim 7).

Regarding claim 6, Allman teaches there is a finishing operation carried out (Column 11, line 65-Column 12, line 5).
